### Objectives and investment policy

NDR Active Allocation - Kathrein Fund (R) is a fund of funds whose investment goal is long-term capital growth subject to a higher level of risk. It invests at least 51 % of its fund assets in units in other investment funds. The fund may also invest in securities, in bonds and money market instruments issued by sovereigns, supranational issuers and/or companies etc. and in sight deposits and deposits at notice. Within the scope of the fund's investments, it may give consideration to the research findings and the capital market assessments of Ned Davis Research (NDR). Units in investment funds are mainly selected on the basis of the quality of the investment process, their performance to date and their risk management.

The fund is actively managed without reference to a benchmark.

Within the framework of the investment strategy, the fund can primarily invest in derivative instruments (in relation to the related risk) and use derivative instruments for hedging. In unit class A the fund's income will be distributed on 15.02. Distributions of the fund's core assets and interim distributions are also permitted. In all further unit classes the fund will retain any income which will increase the value of its units.

Except in case of a suspension due to extraordinary circumstances, unit holders may require daily redemption of units by the custodian bank at the applicable redemption price.

**Recommendation:** this fund may not be appropriate for investors who plan to withdraw their money within 10 years.

### Risk and reward profile

Its risk/reward profile relates to past results and should not be used as a reliable indication of its future risk/reward profile. A category 1 classification does not imply a risk-free investment. A risk classification may change over time. The fund has received a category **7** risk classification on the basis of past price fluctuations experienced by the fund or a similar portfolio or an applicable risk definition system.

Risks which are not included in the risk classification but are nonetheless significant for the fund:

**Credit risk:** The fund invests portions of its assets (directly or via credit derivatives) in bonds and/or money market instruments. Issuers may become insolvent (or their solvency may deteriorate). These bonds and/or money market instruments (or credit derivatives) may therefore suffer a partial or complete loss of value.

**Liquidity risk:** It may not be possible to sell a position in due time for an appropriate price. This risk may also lead to a suspension of redemption of unit certificates.

**Counterparty risk:** The fund executes transactions with various contractual partners. These contractual partners may fail to satisfy a claim held by the fund, e.g. due to insolvency.

**Operational risk, safekeeping risk:** There is a risk of losses resulting from a failure of internal processes/systems or external events (e.g. natural disasters). Safekeeping entails the risk of a loss of fund assets which may result from insolvency, breach of a duty of care or abusive conduct by the custodian or a sub-custodian.

**Risks resulting from the use of derivatives:** The fund may make use of derivatives transactions not only for hedging purposes but also as an active investment instrument. This will increase the risk of a fluctuation in the fund's value.

## Charges

The fees charged will be used for the fund's management. They include the charges for the sale and marketing of the fund units. The deduction of these charges will diminish the fund's potential performance.

### One-off charges before and after an investment is executed

<b>Subscription fees</b>	<b>5,00 %</b>
<b>and redemption fees</b>	<b>0,00 %</b>

This is the maximum amount which is deducted from your investment prior to its execution/payment of your return. Please refer to the distribution office concerning the current fees. The subscription fee and the redemption fee indicated above represent the fees charged by Raiffeisen Kapitalanlage-Gesellschaft m.b.H. The distributor may also apply to the subscriber, as is mentioned in the prospectus, entry fees (also defined intermediation fees/sale fees/start-up fee) as a percentage of the amount invested in the fund. For more information, please refer to the information provided by the distributor and - where applicable - to the additional mandatory documentation delivered to and signed by the investor in accordance with the provisions in force in the various countries where the fund units are marketed.

### Charges deducted from the fund in the course of the year

<b>Ongoing charges</b>	<b>1,66 %</b>
------------------------	---------------

The „ongoing charges“ have been calculated on the basis of the figures as of 31.10.2022 including the previous 12-month period. The „ongoing charges“ include the management fee and all fees charged in this period. Third-party transaction costs and performance-related fees are not included in the „ongoing charges“. The „ongoing charges“ may differ from year to year. Please refer to the „Expenses“ sub-item of the current annual fund report for precise details of the cost components included in the „ongoing charges“.

### Charges which the fund may incur in certain circumstances

#### Fees associated with the fund's performance

Up to 20 % per year of the fund's outperformance of a performance mark of 1.40 % p.a., subject to a so-called high water mark. For more information, please refer to Part II, item 15 of the prospectus. In the last financial year, this totaled 0,00 %.

## Past performance

The following graphic shows the fund's performance (tranche AT0000A1DJV9) in EUR. The depicted performance of the fund is also representative for the other tranches referred to on page one.

Raiffeisen KAG calculates performance based on the published fund price, using the OeKB methodology. Individual costs – such as transaction fees, the subscription fee, the redemption fee or custody charges of the investor – and taxes are not included in the performance calculation. These would reduce the performance if they were included. Past value is not a reliable indicator of the fund's future performance. Notice for investors with a different functional currency than the fund currency: We expressly point out that returns may rise or fall due to currency fluctuations. The fund (tranche AT0000A1DJV9) was launched on Jun 1, 2015.
